Day 6

Behold Bootstrap!

July, 2, 2016

© 2016 | Coding Boot Camp - All Rights Reserved

Heeeeeelp Meeeee.....
Hhhhhblub blub blub
quickmeme.com

We've been there…

© 2016 | Coding Boot Camp - All Rights Reserved

take a deep breath.

IT'S ALL GOING
TO BE OKAY.

YOU ARE FREAKING AWESOME

Today's Class

© 2016 | Coding Boot Camp - All Rights Reserved

Objectives

1. Students will use **Twitter Bootstrap** to create layouts

2. Students will learn to use **media queries** for mobile responsive websites

3. Students will learn to use the **viewport** tag to make sure all devices are displaying web pages optimally

© 2016 | Coding Boot Camp - All Rights Reserved

Focus!

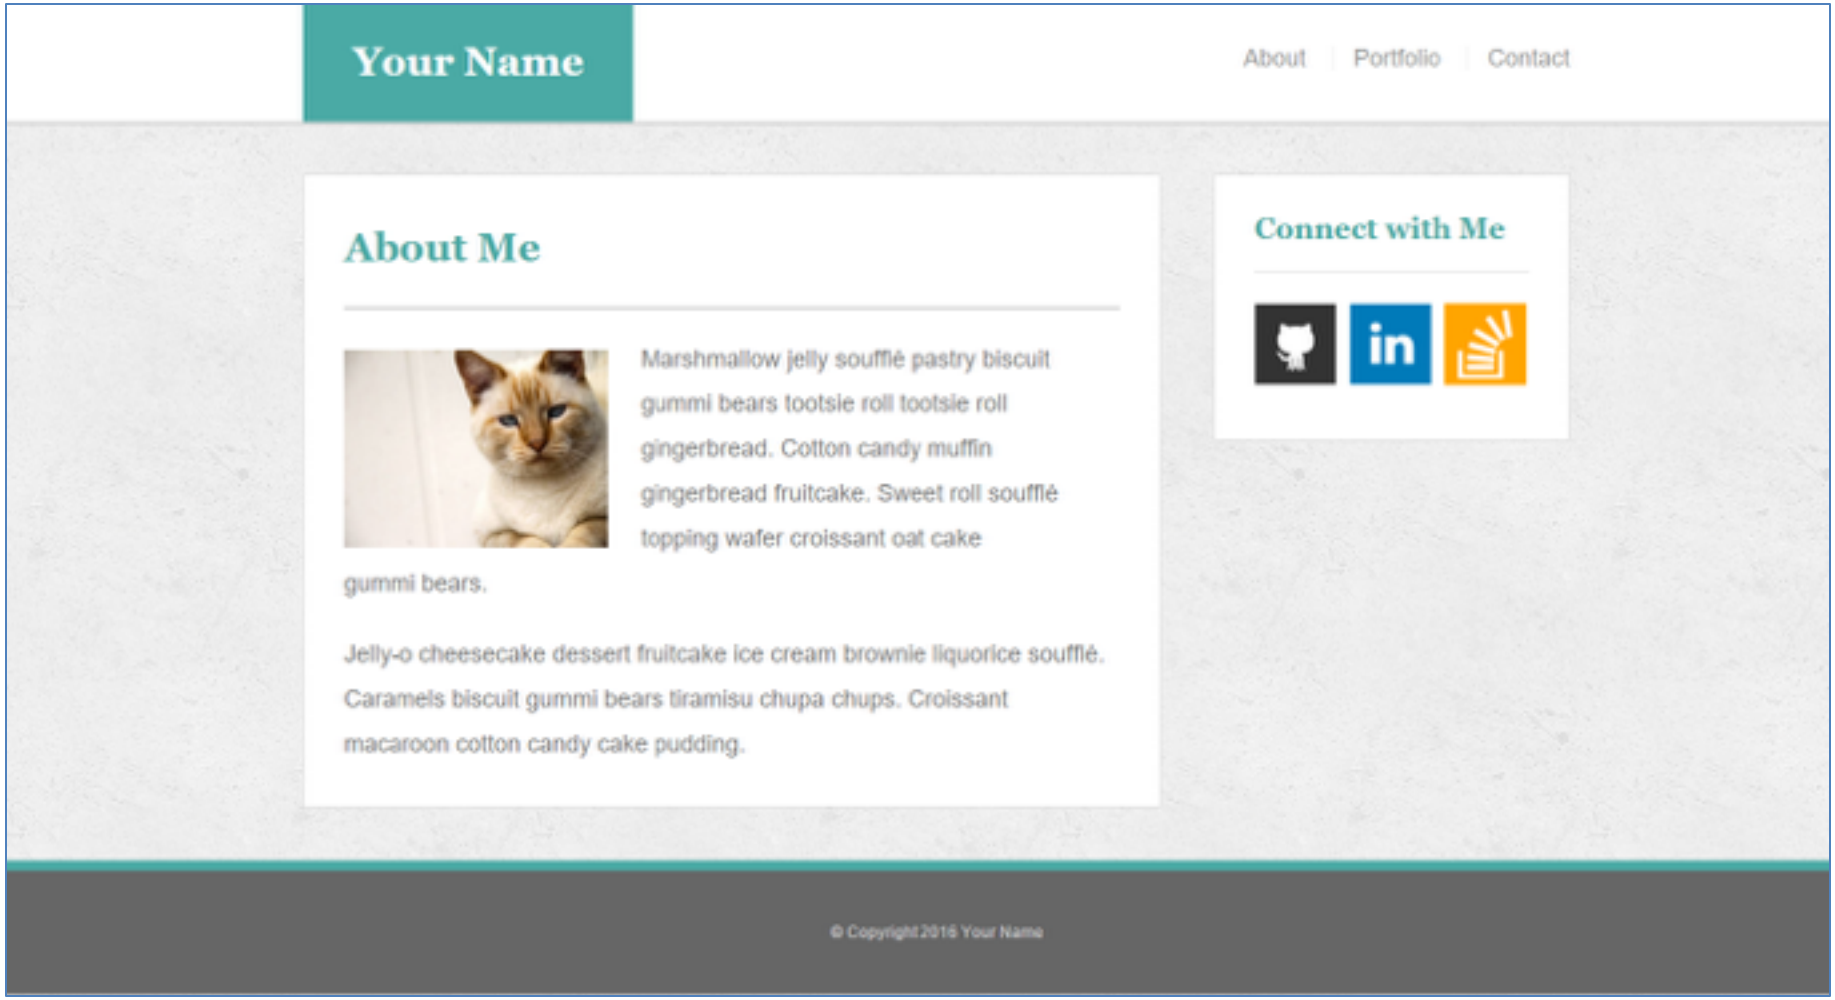
This stuff is important…

© 2016 | Coding Boot Camp - All Rights Reserved

Recap Bootstrap

© 2016 | Coding Boot Camp - All Rights Reserved

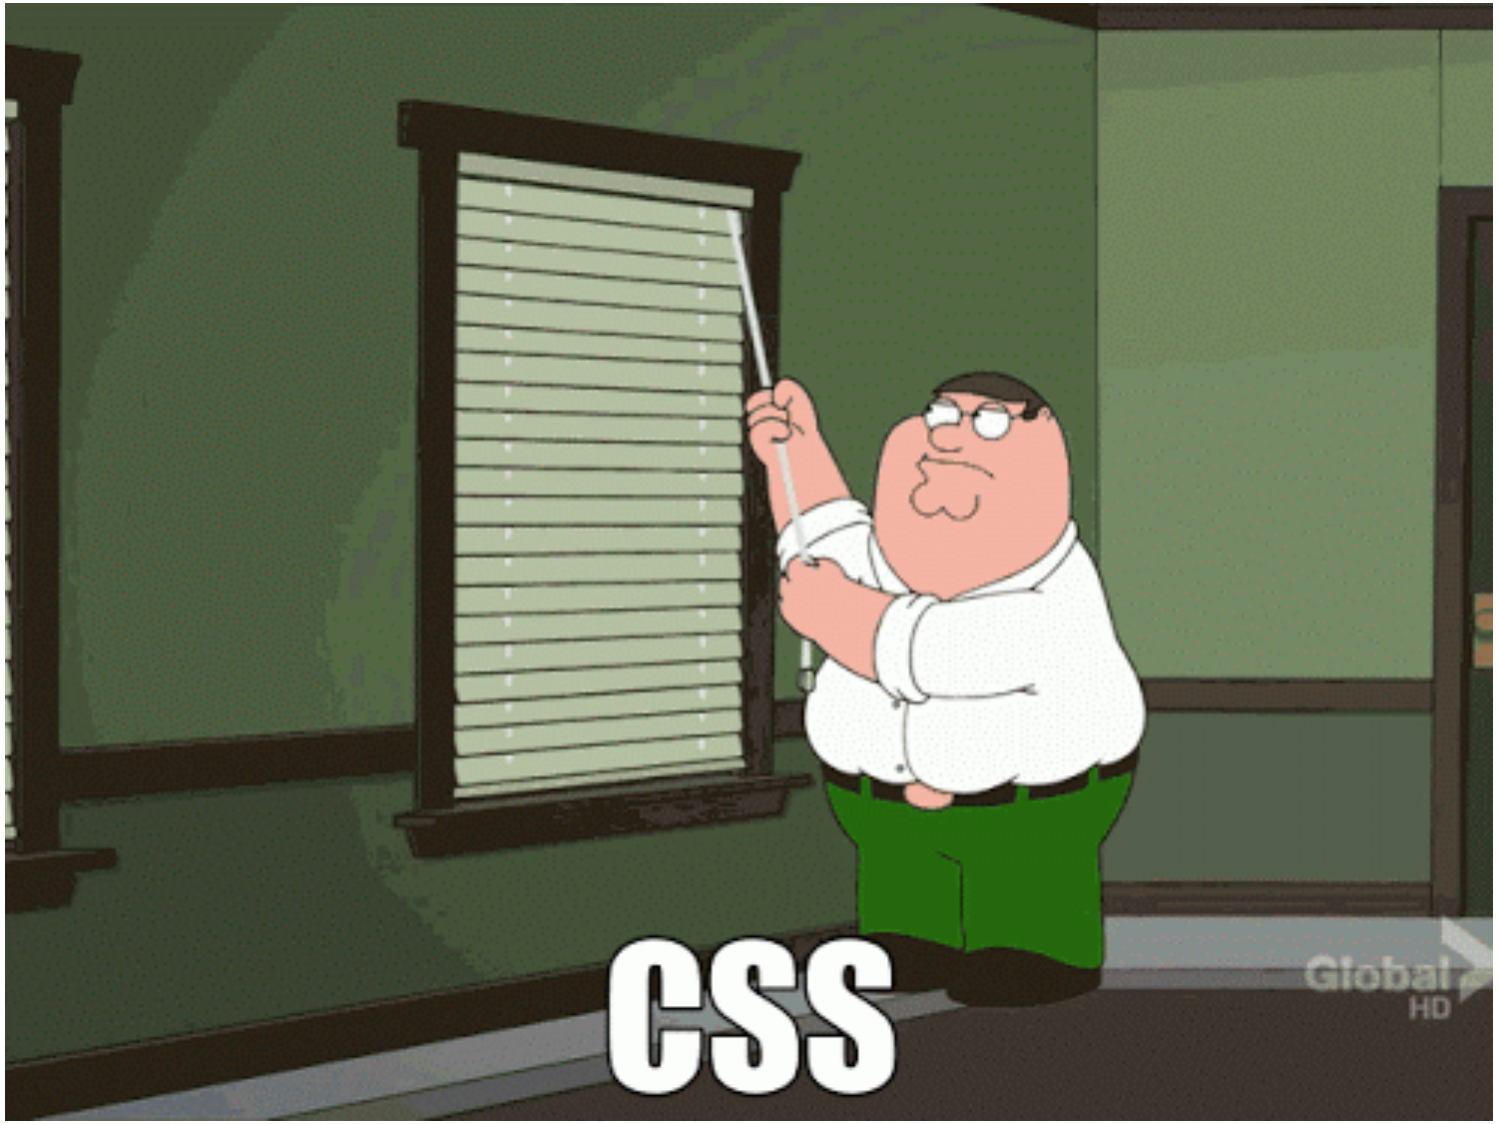
The Pains of HW 1



Plan HTML + CSS makes layout building challenging

© 2016 | Coding Boot Camp - All Rights Reserved

How You (Probably) Feel About CSS



© 2016 | Coding Boot Camp - All Rights Reserved

But Then Came Bootstrap…

© 2016 | Coding Boot Camp - All Rights Reserved

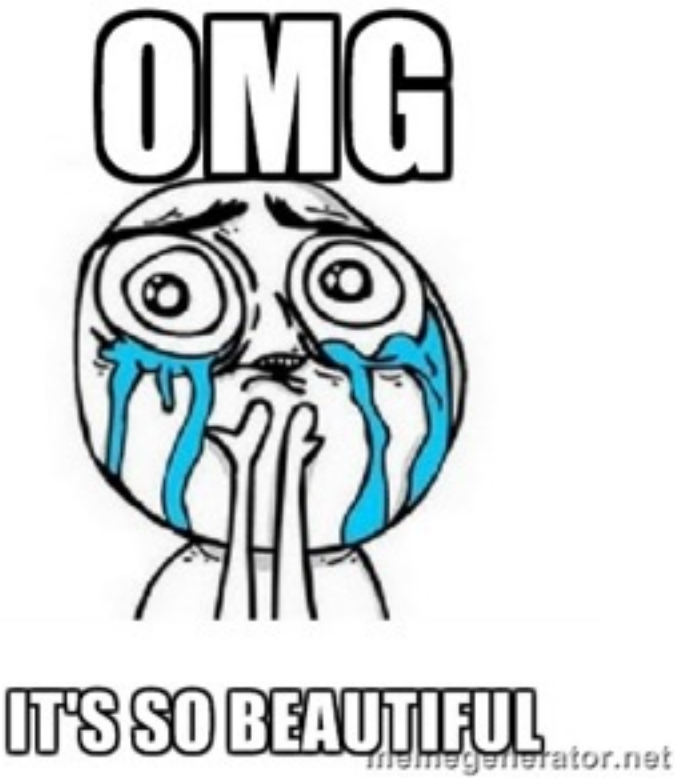
Big Deal!!!



Using Bootstrap,
we have <u>PRE-DEFINED</u> CSS Styles.

© 2016 | Coding Boot Camp - All Rights Reserved

Why Use Bootstrap?

- **<u>Reason #1: UI Kit</u>**
- Familiarize yourself with the UI features it offers via the documentation.
- Once Bootstrap is active, you can simply copy snippets from the documentation to save yourself major time of creating elements yourself.

© 2016 | Coding Boot Camp - All Rights Reserved

Why Use Bootstrap?

Reason #2: Mobile Responsiveness

- One of the most compelling reasons to use Bootstrap is the default **mobile-responsive** quality it provides.

- This means that your website will look “good” automatically when viewed on screens ranging from monitors to tablets to phones.

© 2016 | Coding Boot Camp - All Rights Reserved

> YOUR TURN!!

Warmup Activity:

As a repeat of last class, quickly create an HTML webpage.

Then add in a Bootstrap component of your choosing.

Hint: Copy the Bootstrap CSS link. Then copy the code from any Bootstrap element or CSS.

© 2016 | Coding Boot Camp - All Rights Reserved

Next Phase Bootstrap

Last class, we focused on Bootstrap Components (like buttons and tables).

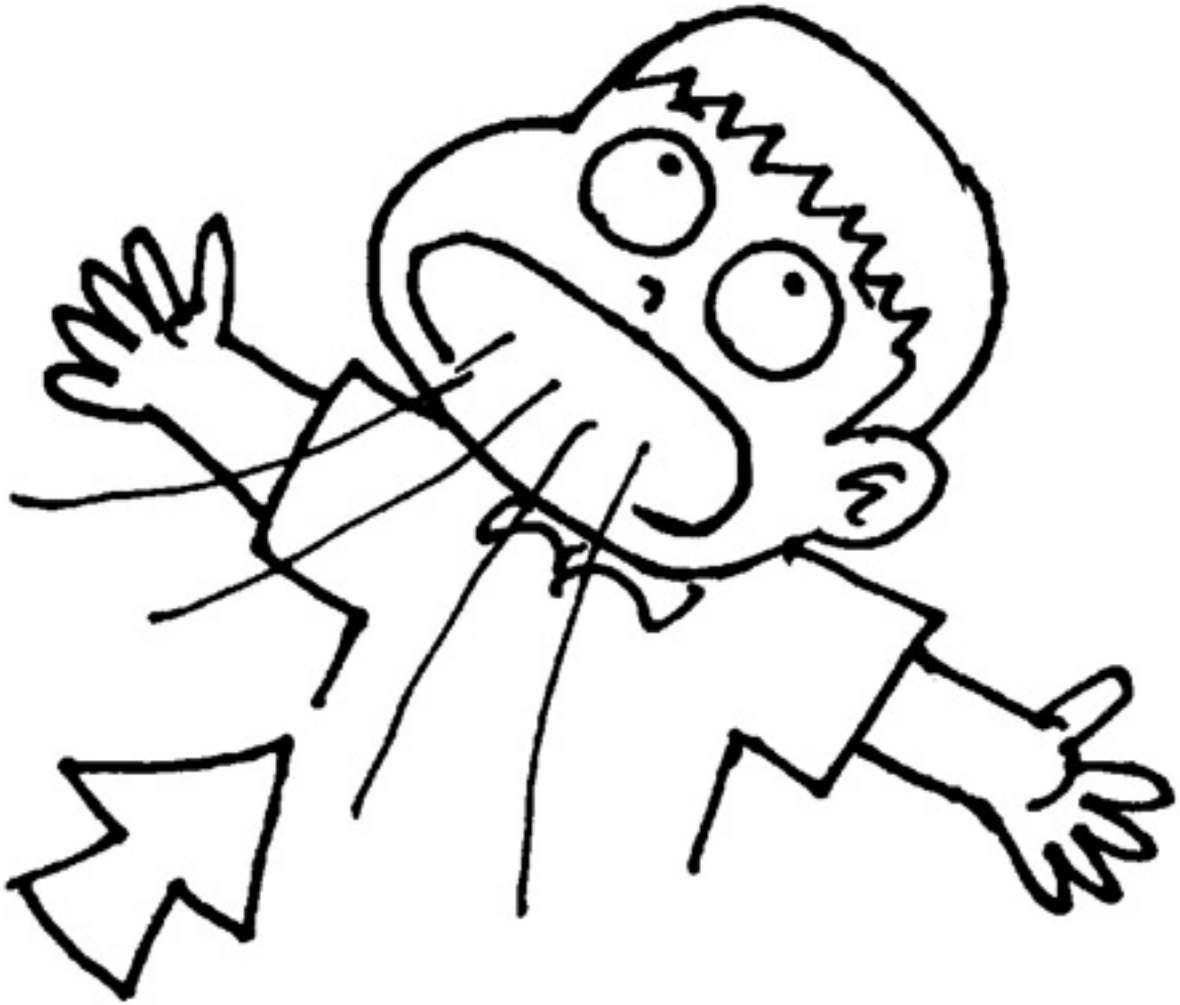
Today we'll be focused on using Bootstrap to build layouts.

© 2016 | Coding Boot Camp - All Rights Reserved

Sketching / Grid Layouts

© 2016 | Coding Boot Camp - All Rights Reserved

Take 5 Huge Breaths…



© 2016 | Coding Boot Camp - All Rights Reserved

FOCUS!

Because in our opinion, these next two sections are of the

MOST IMPORTANT ONES

in the **ENTIRE** program.

Facebook surf at your own peril (and to the peril of the galaxy)

© 2016 | Coding Boot Camp - All Rights Reserved

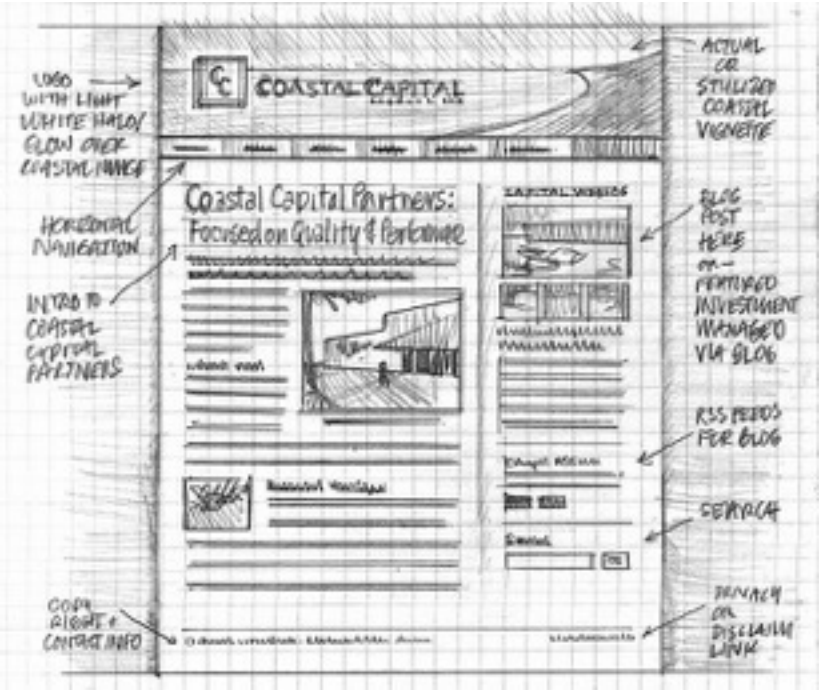
FOCUS!

Relax. That doesn’t mean its hard.

© 2016 | Coding Boot Camp - All Rights Reserved

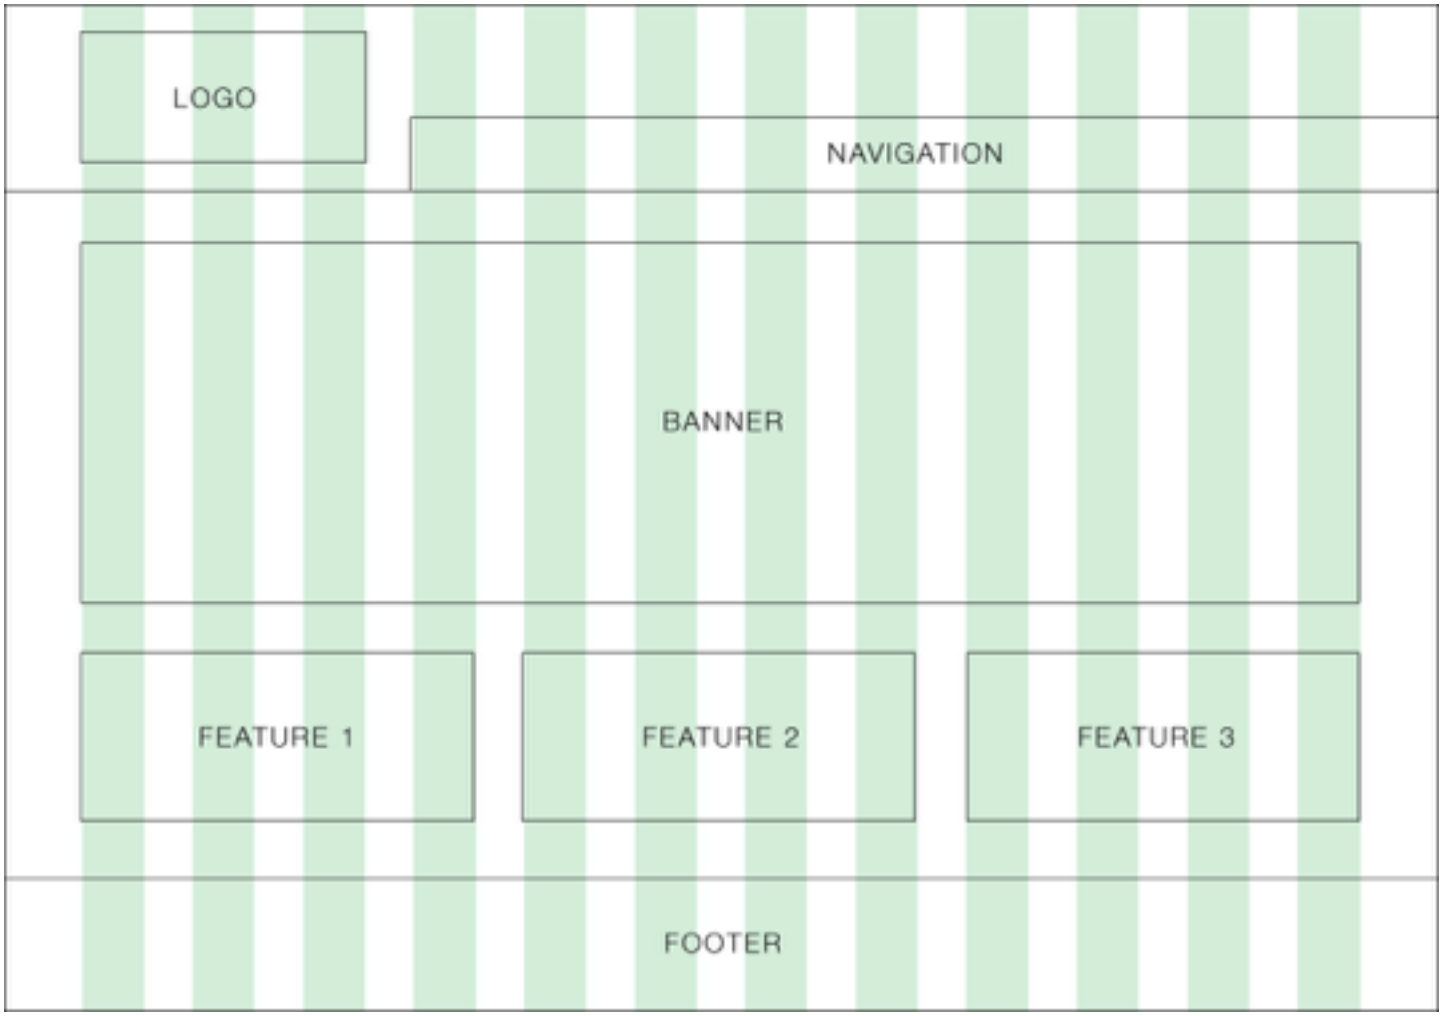
Importance of Sketches

- Because every aspect of a site's "look" is defined by HTML/CSS – it is crucial to have a detailed sketch going in.
- Pay particular attention to the location of navigation bars, titles, headers, content, images, footers etc.
- When imagining alignments, in particular, be mindful of the ***grid***



© 2016 | Coding Boot Camp - All Rights Reserved

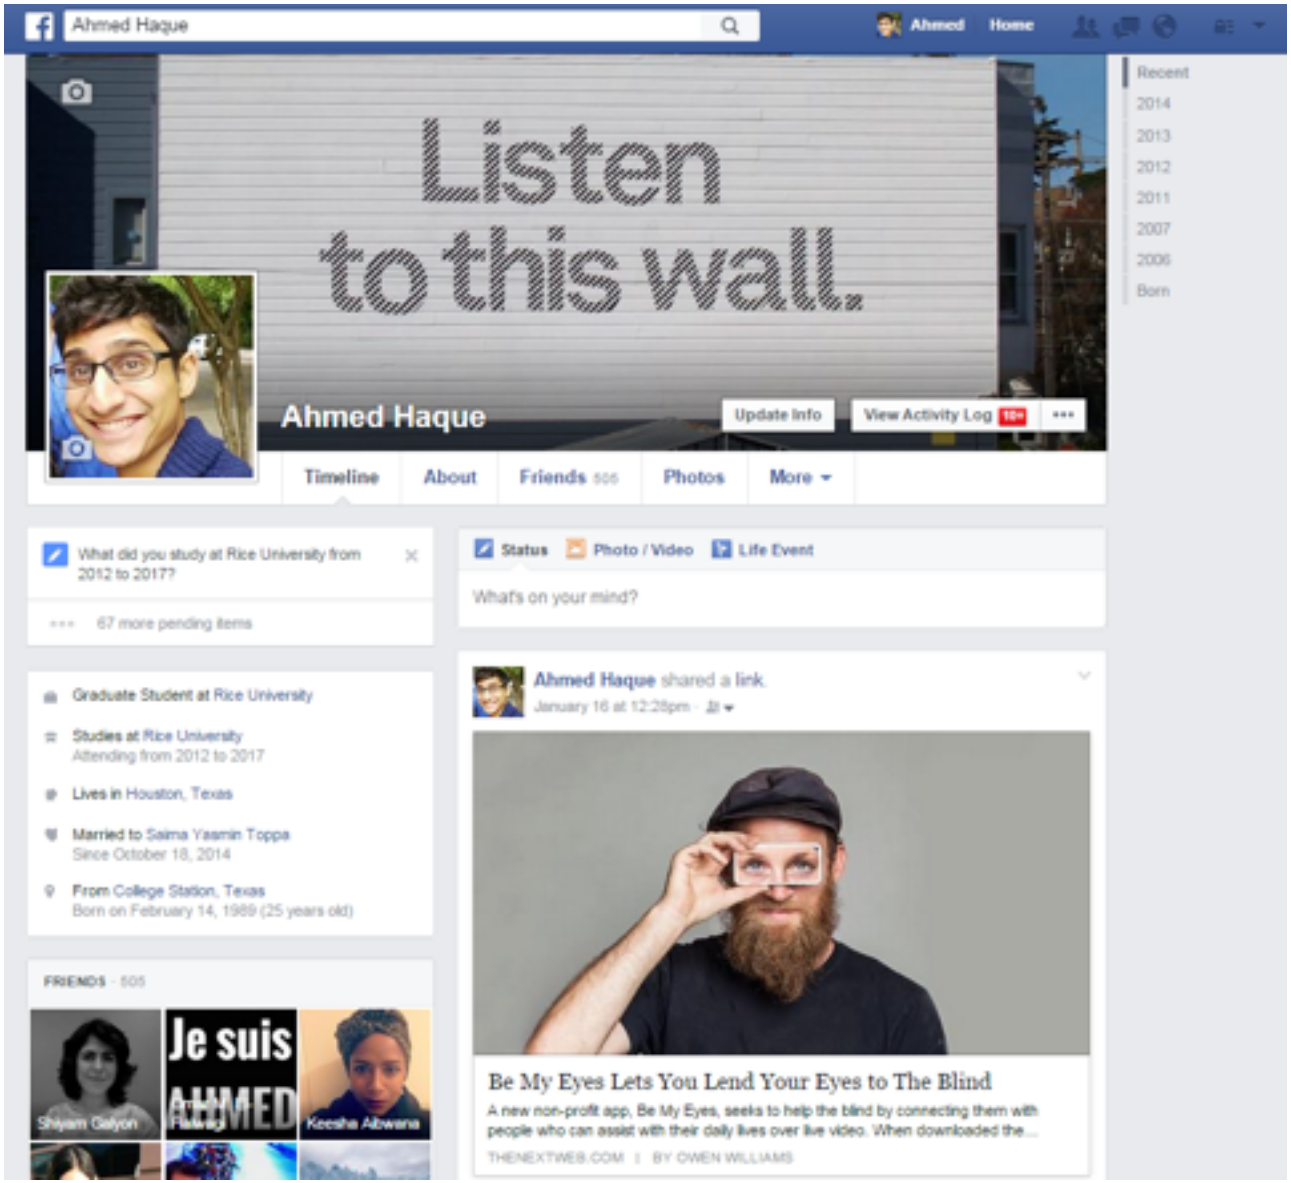
Designing with a Grid in Mind



- Grids serve to align elements aesthetically.

© 2016 | Coding Boot Camp - All Rights Reserved

Facebook's Grid



Facebook is a perfect example of a website where the "grid-layout" is obvious.

Grids make it easy to have content (text, images, and regions) align aesthetically.

© 2016 | Coding Boot Camp - All Rights Reserved

A More Complex Grid…

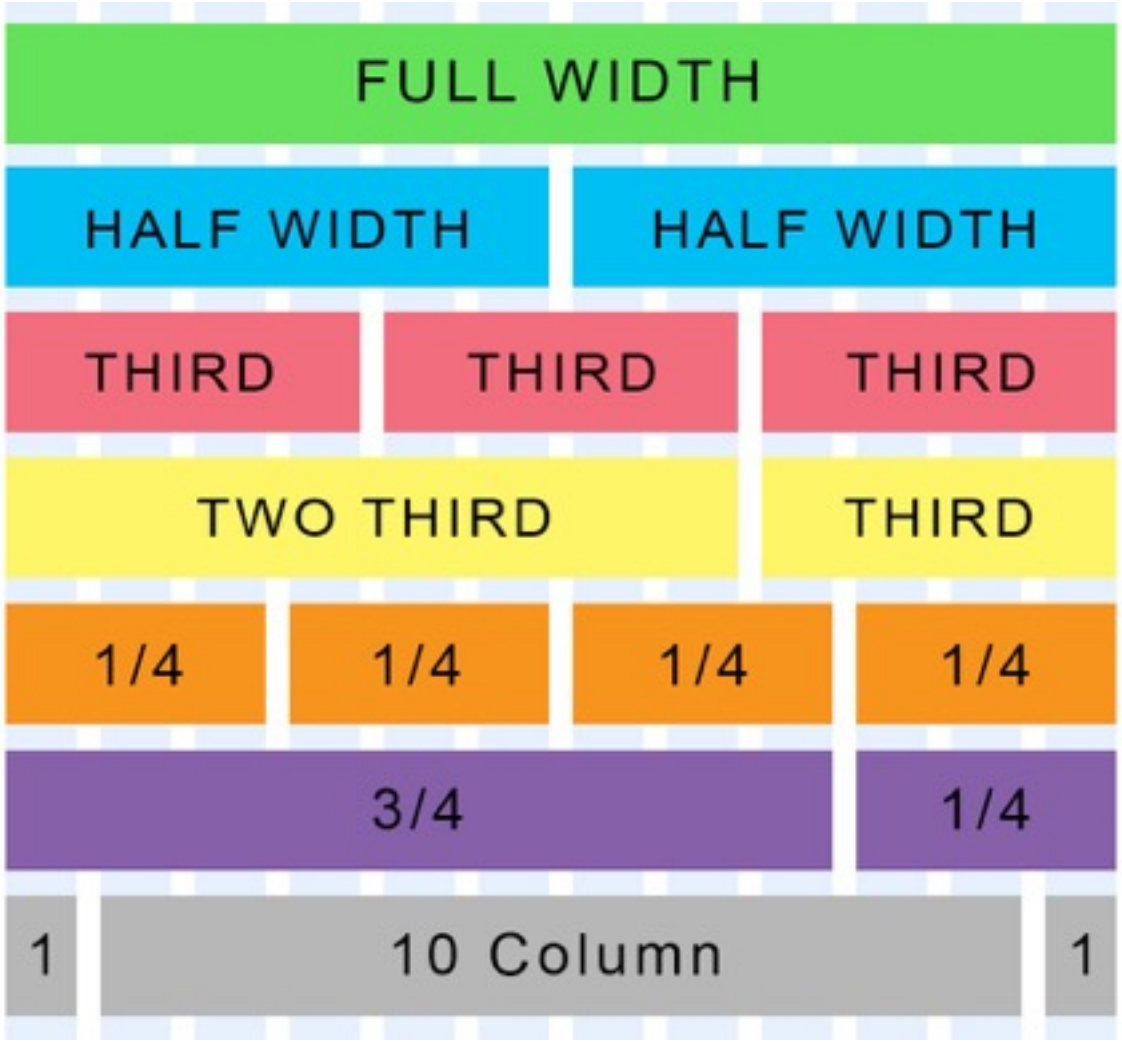
Bootstrap Grid



Bootstrap lets you organize content based on the “number of columns” a div spans – out of a total 12 columns.

Example:

(Spans full width)

(Spans 1/3 of full width)

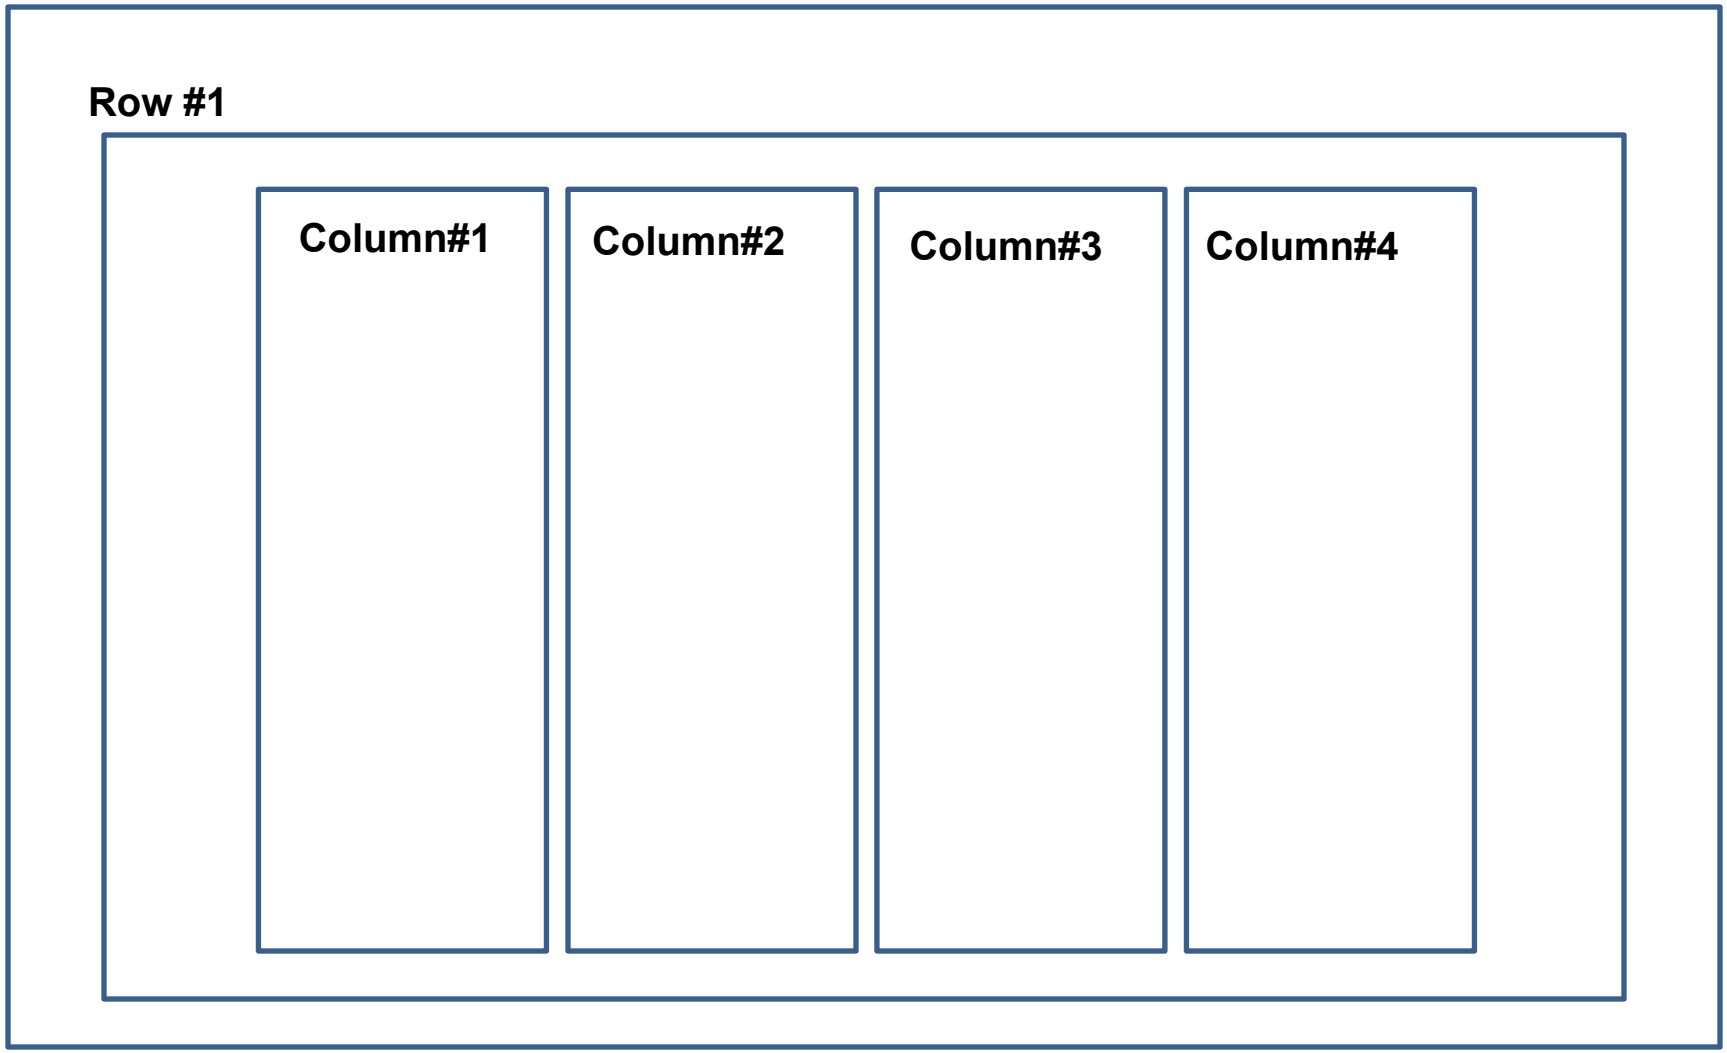
© 2016 | Coding Boot Camp - All Rights Reserved

Bootstrap Grids

- Every Bootstrap Grids is made up of…
  - **containers** - which wrap around the entire grid)
  - **rows** - which are defined first and are just rows)
  - **columns** - which are defined within rows and specify the columns. The sum total of all columns within a row **must** add up to 12.
- Each of these elements is implemented by creating a **div** with a specific class name.

© 2016 | Coding Boot Camp - All Rights Reserved

Defining Columns



© 2016 | Coding Boot Camp - All Rights Reserved

> YOUR TURN!!

Quick Activity:

Turn to your neighbors and explain to one another:

1. The relationship between **containers**, **rows**, and **columns**. (Draw it on a piece of paper for them)

2. The syntax for each.

3. The specific syntax details for columns.

© 2016 | Coding Boot Camp - All Rights Reserved

INSTRUCTOR DEMO!

Instructor: Demo

(quickgrid.html | 2-InstructorGrids)

© 2016 | Coding Boot Camp - All Rights Reserved

Bootstrap Grid

```
<!-- Creates the Overall Grid -->
<div class="container">

    <!-- First Row -->
    <div class="row">
        <!-- First (and only column) -->
        <div class="col-lg-12">
            <h1>I'm in Column 1 of 1. I stretch the entire width. And keep going.</h1>
        </div>
    </div>

    <!-- Second Row -->
    <div class="row">
        <!-- First of two columns -->
        <div class="col-lg-6">
            <h1>I'm in Column 1 of 2</h1>
        </div>
        <!-- Second of two columns -->
        <div class="col-lg-6">
            <h1>I'm in Column 2 of 2</h1>
        </div>
    </div>

</div>
```

Note the rows, columns (col-lg-6), and containers

© 2016 | Coding Boot Camp - All Rights Reserved

Bootstrap Grid

```
<!-- Creates the Overall Grid -->
<div class="container">

    <!-- First Row -->
    <div class="row">
        <!-- First (and only column) -->
```

```
        </div>
        <!-- Second of two columns -->
        <div class="col-lg-6">
            <h1>I'm in Column 2 of 2</h1>
        </div>
    </div>

</div>
```

Note the rows, columns (col-lg-6), and containers

© 2016 | Coding Boot Camp - All Rights Reserved

Defining Containers

```
<!-- Creates the Container -->
<div class="container">
    <!-- Inside we fill it up with rows and columns -->
</div>
```

“Containers” are like the box that the entire grid sits inside.

© 2016 | Coding Boot Camp - All Rights Reserved

Defining Rows

```
<div class="container">

    <!-- Defines the row -->
    <div class="row">
        <!-- Columns fit inside -->
    </div>

</div>
```

“Rows” are like the rows we talked about earlier.

© 2016 | Coding Boot Camp - All Rights Reserved

Defining Columns

```
<div class="row">

    <div class="col-md-4">
        <!-- This is column 1 of 3 -->
    </div>
    <div class="col-md-4">
        <!-- This is column 2 of 3 -->
    </div>
    <div class="col-md-4">
        <!-- This is colmn 3 of 3 -->
    </div>

</div>
```

“Columns” fit inside of rows. Note the syntax: col-sz-#

Col = column

sz = viewing size (in this case: medium)

= number of “columns taken” out of 12. (in this case 4 of 12)

© 2016 | Coding Boot Camp - All Rights Reserved

> YOUR TURN!!

Activity:

Using Twitter bootstrap, create a layout that looks like the one shown on the next screen.

- Spend some time prior to coding to draw out the grid layout
- Count the number of rows and columns
- Then use the bootstrap grid syntax to code it out.
- Slack a screenshot of your page when you are done.

© 2016 | Coding Boot Camp - All Rights Reserved

> YOUR TURN!!
